Muzaffer Bener

Software Development Student — seeking a Java Engineer Internship

muzafferbener@icloud.com · Wrocław, Poland · muzo.sh · github.com/muzo-sh · linkedin.com/in/muzosh

PROFILE

Third-year Software Development student at WSB Merito University Wrocław (graduating February 2028), with coursework in algorithms, data structures, object-oriented programming, databases, operating systems and networking. I am learning Java through a hands-on project and looking for a mentored internship where I can learn quickly from experienced engineers. Team leader in international Erasmus+ projects; English at C1 level. Available 30 hours per week for a 6-month internship.

TECHNICAL SKILLS

Languages	Python (university coursework) · Java (learning, first project in progress) · SQL (basics) · HTML, CSS, JavaScript (personal website)
Tools	Git and GitHub (commit, push) · Vercel (deploying my website)
Foundations	Object-oriented programming · Data structures and algorithms · Relational databases · Operating systems (Linux and Windows Server administration) · Networking basics · Software testing basics

PROJECTS

Garage Log — Java 17 console application — github.com/muzo-sh/garage-log

- Tracks fuel and service history, calculates fuel consumption and service reminders, and saves the data to a text file.
- Decodes OBD-II car data (coolant temperature, fault codes) and shows step-by-step checks for common faults.
- 55 automated checks. Built while learning Java, with AI assistance, and documented in a written walkthrough.

Personal website — HTML, CSS, JavaScript — muzo.sh

- Responsive site with an English / Polish / Turkish switch, a 3D intro animation and a small puzzle game; deployed on Vercel. Built with AI assistance.

EXPERIENCE

Student Team Leader — Erasmus+ projects, Torbalı Anatolian High School, Turkey — 2022 – 2024

- Led student groups of 3–10 people in 4 official Erasmus+ projects and several school-hosted exchanges (about 10 international activities, including Greece, Germany and Turkey).
- Coordinated tasks, represented the school abroad, and helped local and foreign students work together in English.

Production Operator, part-time — LG Energy Solution Wrocław — Oct 2024 – Feb 2025

- Operated automated machinery on a lithium-ion battery assembly line (about 40 working days).
- Followed technical, quality and safety procedures and inspected components.

EDUCATION

Software Development, undergraduate — WSB Merito University Wrocław — 2024 – 2028 (expected Feb 2028)

Coursework: Algorithms and Data Structures · Python (basic, object-oriented, advanced) · Database Systems · Operating Systems · Linux and Windows Server administration · Network Technologies · Software Testing · Machine Learning basics. **This semester:** Cloud application architecture · Software Engineering · Open Source Tools.

Torbalı Anatolian High School — Math / Language track — 2020 – 2024

LANGUAGES

Turkish (native) · English (C1, certificate from British Culture Language Schools, 2022) · German (pre-intermediate) · Polish (beginner)
